Dion Brown is passionate about food.

He started cooking with his mother when he was six. As a young adult, he landed a job working as a dishwasher for the Holiday Inn in downtown South Bend. He stayed there for 16 years, slowly working his way up to food preparation, breakfast cook, lunch cook and, finally, chef.

Six months later, the company closed its doors and he had to find another job. The new job didn't last long.

“My brother passed away, so I went through a little depression,” Dion explained. “He lived with me for a time, so every morning I got up he was there and every night when I came home, he was there.”

“And then all of a sudden, he wasn’t there. I basically shut down and did some stupid stuff at my job *and* got fired.”

During this time, Dion’s mother also became sick and began to forget things. She was diagnosed with a form of Alzheimer’s. It was a lot to handle and Dion says he didn’t handle it well. He mostly spent his days smoking marijuana to deal with the pain.

His sister encouraged him to get back on his feet and, in 2016, she registered him for Brandon Murphy’s high school equivalency class. “When I first met him,” Murphy said, “he was a little undecided about what he wanted do.”

Meet Chef Dion Brown

Cultivate Culinary School & Catering “is devoted to ending the cycle of joblessness, poverty, and hunger in the local communities of northern Indiana by providing a food rescue service and job training in the culinary arts.”

But Murphy says Dion’s confidence began slowly to grow. He passed three of the five sections of the readiness test on the first try, something he did not expect to do. Dion decided to stick with the class. His plan was to try and get his HSE and then figure out the rest.

But earlier this year, adult education’s career coach Deb Lane approached him about participating in a culinary class being offered through **Cultivate Culinary**, a new South Bend community partner. It would help him to refresh his skills, she told him. Dion signed up. The class lasted two months and provided hands-on training in food safety, food preparation, and knife skills.

“I asked him while I was in the class if there were any open positions,” Dion said. “They help people. They rescue food and they repackage it to give to people who could use the help.”

The organization liked him, too. A week after the culinary class ended, he started cooking for employees at the Goodwill center where Cultivate Culinary is based, helping the chef to plan and prepare meals and clean up.

“I Really Love the Company”

“When I get into the kitchen I usually see what I need to do and I go,” Dion said. This initiative and drive has translated to the classroom as well, where he is finishing his HSE. He hopes to earn his diploma by December.

“His mindset completely changed this year,” Murphy said. “He’s learned to trust his judgement. Now he’s a leader in Cultivate and he’s a leader in the classroom.

As for Dion, he’s thrilled to be working with food again, and to get the chance to watch people savor his cooking.

Meet Margarita Diaz

Margarita Diaz attended ELL classes to improve her English. Struggling with depression, Margarita often wanted to stop going to class, but she noticed that attending school was good for her mental health.

She pushed herself to continue in school, and was even more motivated after speaking with her child's teacher.

"I went to a parent-teacher conference for my daughter. The teacher told me that my daughter said, 'I'm very proud of my mom because she is going to school to learn English.'"

Margarita was inspired by her daughter's words and told herself, "I CAN DO IT!"

Teacher Brenda Gaston shared that Margarita was an extremely dedicated student. “She put in numerous hours to reach her goal. She was always looking to improve herself and help her classmates.” She earned her HSE diploma and graduated in June. “Achieving the HSE means a lot to me and also to my three children. I feel really proud of myself, and I enjoy knowing that I am able to help others succeed. Best of all, I am able to help my children with their homework,” Margarita said.

Nothing Can Stop Her NOW!

"Not only has she taken me to practices, games, meets . . . she still found time to do her homework and manage to get her high school diploma before me. All I have to worry about is school and sports while she has three kids and a husband to worry about. I feel like this was an obstacle that stopped her from doing more things and now that she has crushed this obstacle, nothing can stop her."

ASSESSING
SECONDARY
COMPLETION™

“The first day I went to school was a joyful day for me. I had been waiting many years to further my education. Studying subjects (like social studies and science in addition to language, reading and mathematics) became harder for me due to my lack of comprehension in the English language.

“I recalled a few times wanting to quit. With the encouragement of my teachers and the determination of studying four to five hours every day made it possible for me to accomplish the TASC. I remember the day I went to school, and got the great news from my teacher that I had passed the TASC test. **That day I felt tremendous joy in my heart for this huge accomplishment in my life.** I would like to thank (my teachers) and tutors for all their help and support. I want to encourage the teachers to continue to teach the way they are teaching. You are doing a great job”

- Same 6 levels but new domains / strands for each
- Increase in specificity & rigor (cognitive demand)
- Language of exit descriptors shifting away from limiting statements to elaborate detail
- Employability skills embedded throughout (often look like academic skills)

Employability Skills Framework website for reference

From: http://www.in.gov/dwd/abe/files/Statewide_Webinar_2_11_15.pdf

NRS Changes Example: NRS Level 1 Math

Old:

Individual has little or no recognition of numbers or simple counting skills or may have only minimal skills, such as the ability to add or subtract single digit numbers.

New:

Students prepared to exit this level are able to **decipher a simple problem presented in a context** and **reason** about and **apply** correct units to the results. They can visualize a situation **using manipulatives or drawings** and **explain** their processes and results using mathematical terms and symbols appropriate for the level. They **recognize errors** in the work and reasoning of others. They are able to **strategically select** and **use** appropriate tools to aid in their work, such as pencil/paper, measuring devices, and/or manipulatives. They can see patterns and structure in sets of numbers and geometric shapes and use those insights to work more efficiently.

Number Sense and Operations: Students prepared to exit this level have an understanding of whole number place value for tens and ones and are able to **use their understanding** of place value to compare two-digit numbers. They are able to add whole numbers within 100 and **explain their reasoning**, e.g., using concrete models or drawings and strategies based on place value and/or properties of operations. They are able to **apply their knowledge** of whole number addition and subtraction to represent and solve word problems that call for addition of three whole numbers whose sum is less than 20 by using such problem-solving tools as objects, drawings, and/or simple equations.

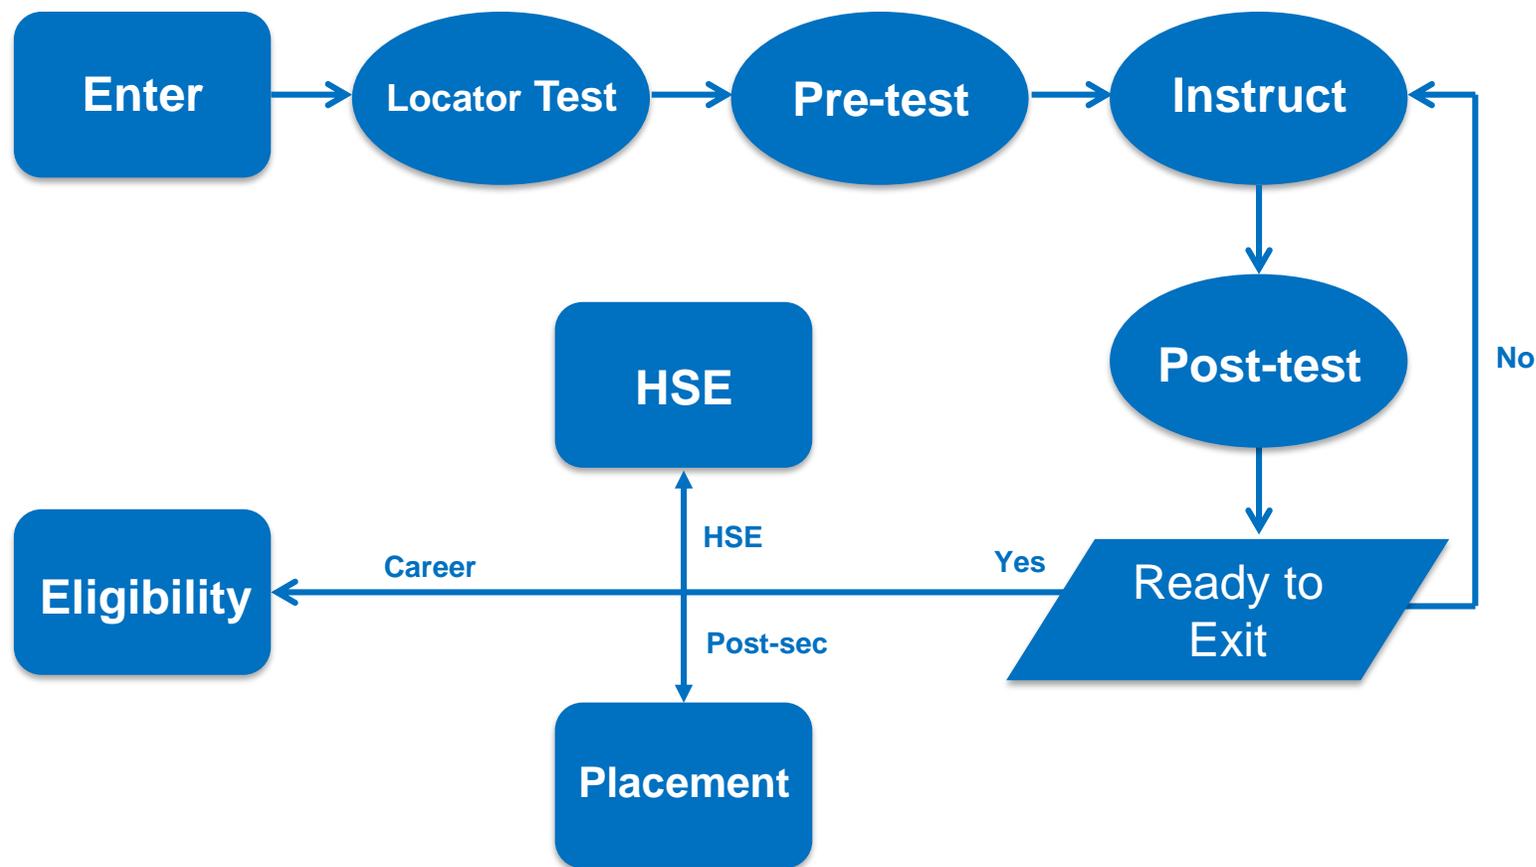

Algebraic Thinking: Students prepared to exit this level **understand and apply** the properties of operations to addition and subtraction problems. They understand the relationship between the two operations and can determine the unknown number in addition or subtraction equations.

Geometry and Measurement: Students prepared to exit this level can **analyze and compare** 2-dimensional and 3-dimensional shapes based on their attributes, such as their shape, size, orientation, the number of sides and/or vertices (angles), or the lengths of their sides. They can **reason** with two-dimensional shapes (e.g., quadrilaterals and half- and quarter-circles) and with three-dimensional shapes (e.g., right prisms, cones, and cylinders) to **create composite shapes**. They are able to measure the length of an object as a whole number of units, which are not necessarily standard units, for example measuring the length of a pencil using a paper clip as the length unit.

Data Analysis: Students prepared to exit this level are able to **organize, represent, and interpret** simple data sets (e.g., lists of numbers, shapes, or items) using up to three categories. They can answer basic questions related to the total number of data points in a set and the number of data points in each category, and can compare the number of data points in the different categories.

TABE 11&12: Level L

- Level L can be used to screen adult examinees entering literacy programs. Level L accomplishes this by screening for:
 - Visual/reversal problems
 - Auditory skills/sound discrimination
 - Beginning comprehension skills
 - Beginning mathematics application skills
 - Beginning grammar, capitalization, punctuation, and spelling skills
 - Vocabulary and word meaning
 - Beginning reading skills

TABE 11&12: Levels E/M/D/A Reading

- TABE 11&12 Reading content reflects mature, life- and work-related situations and highlights overlapping objectives, from word-meaning skills to critical-thinking skills
 - These are measured using texts and forms familiar to everyday adult lives, as well as through excerpts that reflect our cultural diversity
 - Based on OCTAE CCR standards focused largely on informational texts (e.g. research, scientific, historical information)
 - The previous focus on literary text (e.g. fiction, memoir, poetry) is significantly decreased

TABE 11&12: Levels E/M/D/A Mathematics

- TABE 11&12 Mathematics reflects math application, particularly routine tasks such as estimating quantities and making computations involving time, distance, weight, etc.
 - Standards have more emphasis on applied versus computation skills
 - Item sets are integrated by mathematical contexts appropriate for adults
 - The objective distribution at Level A is very closely aligned with the content distribution of the TASC/HSE Mathematics test

TABE 11&12: Levels E/M/D/A Language

- The goal of adult language instruction is to build communication skills necessary for functioning effectively on the job and in daily life
 - TABE Language assesses skills in grammar, usage, mechanics, sentence formation, and paragraph development. Understanding of word meaning and relationships, context, spelling, capitalization and punctuation in sentences, phrases, and clauses is included
 - Items are presented in meaningful contexts that reflect the writing process as it is applied in life
